

BIMTES
E-LAB

WE MANAGE ALL DAMAGES®

BİMTES E-LAB is established in 1987 to provide technical services in electronic and computer domains, aiming to be capable of restoring all types of malfunctioned electronic devices by complying with the cutting-edge technology.

We continue our business improving our quality of technical services with our principles to prevent business losses and contribute to national economy.

In 1995 we established our **BİMTES HG** unit, in order to refunction constructions and devices damaged particularly due to disasters such as fire or flood in shortest time and minimum cost.

We cooperated with globally renowned **BELFOR** in 2002 and extended our business to industrial and residence restoration influentially.

We appreciate our partners and our clients for all their contributions.

DAMAGE RESTORATION

BIMTES HG manages all sorts of constructional, mechanical and electronic damages caused by fire, flood or other destructive disasters with its turn-key solutions and helps you get back to business immediately.

ELECTRONIC SUPPORT

BIMTES E-LAB provides periodic preventive maintenance services and technical support for PCs, servers and middle range systems, as well as repair services for industrial and commercial printed-circuit cards and other devices.

DATA RECOVERY

BIMTES E-LAB is specialised in recovering damaged or inaccessible data in all electronic and digital devices from memory sticks to RAID levels and “bringing your time back.”

We were established in 1987 and from that day on we never departed from our way of service mentality.

Our service concept was always "achieving the impossible". Today we continue our business with the very same mentality and attention.

Along with the confidence of our valued customers and insurance companies, we are honoured to service to you on behalf our our ever-growing company in conformity with professional business approach.

Sincerely;
Cemil ISLIKÇI

DAMAGE RESTORATION

We manage all damages

Commencing its service within the structure of **BİMTES** in 1995, **BİMTES HG** rapidly expanded its business in damage restoration domain and became the ruling company in insurance damages with its year-to-date projects. Our primary focus is to contribute to the national economy by preventing all damaged valuable wares from loss. **BİMTES HG** minimizes the eventual time and profit loss in your business place following the damage with its optimal application techniques.

Industrial restoration

Eliminating the risk of any loss in your business place and its outfits, **BİMTES HG** dispels a potential undesirable pause that will affect your business futurity adversely. Thus you are enabled to achieve a fast and top quality solution and restart work in the shortest of time. Managed by **BİMTES HG**'s strong infrastructure and professional teamwork, damage restoration process is conducted with the cutting edge application techniques.

FIRE DAMAGE RESTORATION

Along with its direct effects fire disaster also exposes heat, smoke and soot that will inflict substantial damages. In case of a timely and informed response, these damages can be majorly recovered and result in a highest recovery proportion. **BİMTES HG**'s operations in these cases are:

- a) Soot removal
- b) Dehumidification
- c) Disinfection and deodorisation

Soot removal

The consisted soot following the fire taints and causes irrevocable damages in the devices, wares and furnishing. **BİMTES HG** performs corrosion prevention with protection chemicals to eliminate the soot and deleterious bacteria in the environment.

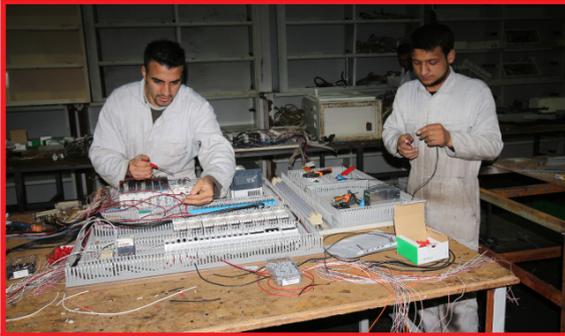

Ozonization

The venue affected by fire, flood or other hazards should be disinfected from airborne particles of bacteria. This operation is led professionally by **BİMTES HG** with ozonization process. Ozonization is performed after the whole affected environment is cleansed by **BELFOR**'s speciality chemicals.

FIRE DAMAGE RESTORATION / Project samples

FIRE DAMAGE RESTORATION / Project samples

WATER DAMAGE RESTORATION

In water damage cases the primary target is to prevent the loss caused due to the mud, acidic substances and bacteria carried by floodwater. **BİMTES HG**'s operations in these cases are:

- a) Water and mud removal
- b) Mud and extraneous matter cleaning
- c) Corrosion prevention
- d) Dehumidification
- e) Disinfection and deodorization

With its rapid and solution-oriented approach, **BİMTES HG** is capable of discharging 2,000 m3 of water per hour at any occasion with the specialty pumping systems in its infrastructure.

Ultrasonic cleaning

In water and fire damages **BİMTES HG** uses ultrasonic cleaning vessels for chemical cleaning purposes. These vessels features lateral and bottom mounted 25-40 kHz ultrasonic generators which will disinfect the damaged from dirt and rust objects with magnetic effect. This operation is managed by **BİMTES HG** specialists with the use of **BELFOR** specialty chemicals.

DATA RECOVERY

BİMTES recovers “information”

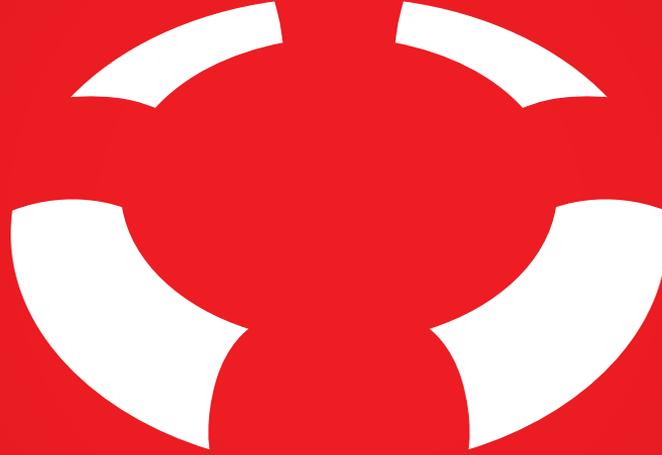

Data recovery requires strong know-how on data recording mediums and data structures, software infrastructure and constant compliance with the latest digital technologies. Recovering operations must be performed in dedicated work environments.

Rendering professional data recovery services for damaged or inaccessible data in all electronic and digital devices from memory sticks to RAID levels, **BİMTES E-LAB** is leading the field in Turkey with its high end techniques.

Clean Room

Existing solely within **BİMTES E-LAB**'s structure in Turkey, Clean Room is a department dedicated only to data recovery and precise device repair operations. **BİMTES E-LAB** performs these operations in Clean Room comprising particle-free air, homogenous and stable temperature and electronic discharge setting.
